This book is sold for personal use. Recipes are provided for home baking; please check your own equipment, ingredient brands, and altitude, as results can vary. These recipes are based on standard baking and yeast-dough ratios, not on documented testing of every recipe in this book. Rise times are estimates — a cooler kitchen will need longer, and doughs should be judged by how they look and feel, not the clock alone.

Always check ingredient labels for allergens before serving to guests.

PART 1

Fundamentals

Three lessons on activating yeast, kneading and proofing enriched dough, and shaping, glazing, and storing sweet breads.

Activating Yeast Correctly

Active dry yeast needs to be dissolved in warm liquid (about 105-110F/40-43C — warm to the touch but not hot) before use. Too hot and it kills the yeast; too cold and it activates slowly. Instant yeast can usually be mixed directly into the dry ingredients, but blooming it in warm liquid first does no harm and is a good habit for consistency.

A properly activated yeast mixture will look foamy and slightly puffed after 5-10 minutes — this is the yeast feeding on sugar and producing carbon dioxide. If it doesn't foam at all, the yeast is likely dead (too old, or killed by liquid that was too hot) and the dough won't rise properly.

Check the expiration date on yeast packets before starting a recipe — this is the single most common reason a yeasted dough fails to rise.

- Warm liquid should be 105-110F/40-43C — warm, not hot
- A properly activated mixture foams within 5-10 minutes
- No foam usually means dead yeast — check the expiration date
- Instant yeast can go straight into dry ingredients, but blooming it works too

Kneading and Proofing Enriched Dough

Enriched doughs (those with butter, eggs, and sugar, like the ones in this book) need more kneading than a lean bread dough, because the added fat coats the flour and slows gluten development. Knead until the dough is smooth, elastic, and passes the 'windowpane test' — a small piece stretches thin enough to see light through without tearing.

The first rise (bulk fermentation) should happen in a warm, draft-free spot until the dough has roughly doubled in size — usually 1-1.5 hours at room temperature, though a cold kitchen can take noticeably longer. Don't rush this by using a hot spot, which can kill the yeast or give an uneven texture.

The second rise, after shaping, is usually shorter (30-45 minutes) and you're watching for the shaped dough to look visibly puffy and spring back slowly when pressed — a sign it's ready to bake, not under- or over-proofed.

- Enriched dough needs more kneading — check with the windowpane test
- First rise: until roughly doubled, in a warm, draft-free spot
- Second rise (after shaping): until visibly puffy, springs back slowly when pressed
- A cold kitchen just means a longer rise time, not a different method

Shaping, Glazing, and Storing Sweet Breads

For rolled items like cinnamon rolls, roll the dough into an even rectangle, spread filling to the edges on the long sides but leave a small clean border on one short end — this is where you'll pinch the seam closed so it doesn't unroll while baking.

A simple glaze (powdered sugar thinned with milk or cream) should be applied once a bake has cooled slightly, usually 10-15 minutes — too hot and the glaze melts into the bread rather than sitting on top as a distinct layer.

Most of this book's yeasted sweet breads freeze well after baking and cooling, wrapped tightly, for up to 2 months — thaw at room temperature and warm briefly before serving for a fresh-baked feel.

- Leave a clean border on one edge when rolling filled dough, to seal the seam
- Glaze once slightly cooled (10-15 minutes), not piping hot
- Most sweet breads freeze well, wrapped, for up to 2 months
- Warm briefly after thawing for the best texture

PART 2

Cinnamon Rolls & Sweet Rolls

Eight rolled, yeasted doughs, from the classic cinnamon roll to sticky buns, monkey bread, and Nutella swirl rolls.

Classic Cinnamon Rolls

The benchmark cinnamon roll this chapter's other rolled doughs build on — soft, enriched dough with a brown-sugar-cinnamon filling.

PREP 30 MIN, PLUS 2 HOURS RISING • BAKE 22-25 MIN • 9X13-INCH PAN • 350F/175C • 12 ROLLS

DOUGH

- 1 cup (240ml) whole milk, warmed to 105-110F/40-43C
- 2 1/4 tsp (1 packet) active dry yeast
- 1/3 cup (65g) granulated sugar
- 1/3 cup (75g) unsalted butter, melted
- 1 large egg
- 4 cups (500g) all-purpose flour
- 1 tsp salt

FILLING

- 1/2 cup (113g) unsalted butter, softened
- 1 cup (220g) packed brown sugar
- 2 1/2 tbsp ground cinnamon

GLAZE

- 1 1/2 cups (180g) powdered sugar
- 3-4 tbsp milk
- 1/2 tsp vanilla extract

METHOD

1. Stir the warm milk, yeast, and a pinch of the sugar together; let sit 5-10 minutes, until foamy.
2. Whisk in the remaining sugar, melted butter, and egg. Mix in the flour and salt to form a soft dough.

3. Knead 8-10 minutes, until smooth and elastic. Place in a greased bowl, cover, and let rise in a warm spot 1-1.5 hours, until doubled.
4. Roll the dough into a 16×12-inch rectangle. Spread with softened butter, leaving a 1-inch border on one long side, then sprinkle with the brown sugar and cinnamon.
5. Roll up tightly from the filled long side toward the clean border, pinch the seam, and slice into 12 rolls.
6. Place in a greased 9×13-inch pan, cover, and let rise 30-45 minutes, until puffy.
7. Heat the oven to 350F/175C and bake 22-25 minutes, until golden. Cool 10 minutes, then drizzle with glaze.

Storage: Store airtight at room temperature up to 2 days, or freeze baked rolls up to 2 months.

Allergens: Contains wheat, egg, and dairy.

Classic Sticky Buns

The cinnamon roll dough baked upside-down over a pecan caramel, then inverted for a sticky glazed top.

PART 3

Brioche-Style Breakfast Bakes

Five rich, buttery brioche bakes, from a classic loaf to a braided wreath and cinnamon sugar twists.

Classic Brioche Loaf

A rich, buttery, egg-enriched bread — the base this chapter's other brioche bakes are built from.

PREP 30 MIN, PLUS 3 HOURS RISING • BAKE 30-35 MIN • 9X5-INCH LOAF PAN • 375F/190C • 1 LOAF, 12 SLICES

- 3 1/4 cups (410g) all-purpose flour
- 1/4 cup (50g) granulated sugar
- 2 1/4 tsp (1 packet) active dry yeast
- 1 tsp salt
- 4 large eggs, room temperature
- 1/4 cup (60ml) whole milk, warmed to 105-110F/40-43C
- 3/4 cup (170g) unsalted butter, very soft, cut into pieces

METHOD

1. Whisk the flour, sugar, yeast, and salt together. Add the eggs and warm milk, and mix until a shaggy dough forms.
2. Knead 10-12 minutes (by hand or mixer), until smooth. Add the soft butter a few pieces at a time, kneading fully between additions, until the dough is smooth, glossy, and elastic.
3. Cover and let rise in the refrigerator at least 4 hours or overnight (a cold rise makes this enriched dough much easier to shape).
4. Shape into a loaf and place in a greased pan. Cover and let rise at room temperature 1.5-2 hours, until puffy.
5. Heat the oven to 375F/190C. Brush with egg wash.

6. Bake 30-35 minutes, until deep golden and a thermometer reads 190F/88C. Cool in the pan 10 minutes before turning out.

Storage: Store airtight at room temperature up to 3 days, or freeze up to 2 months.

Allergens: Contains wheat, egg, and dairy.

Classic Popovers

A simple egg-and-milk batter that puffs dramatically in a hot oven, crisp outside and hollow inside — good with butter and jam.

- 1 cup (240ml) whole milk, room temperature

3. Carefully fill the hot, greased cups about two-thirds full with batter.
4. Bake 30-35 minutes without opening the oven door, until deeply puffed and golden brown.
5. Serve immediately — popovers deflate quickly once removed from the oven.
